Punch grid shredder for flat pile and pallet feeder machines

Reduce the waste volume with the SH 550 shredder. Thanks to efficient extraction of the shredded punched grids - dust-free. For clean and environmentally friendly production!

Option extraction unit

High-performance shredding unit

Reduced waste volume

Applications:

Shredding of waste matrix

Technical Data:

Control: by BS Rotary
Working width: 550 mm

Options:

- ASSUGO 4040[®] extraction unit

Benefits:

- Reduction of waste volume
- Extraction [option] of the shredded punch grid
- Dust-free production when using an extraction system
