

UEB 550 B Transfer unit

to
BSR 550 Servo die-cutter

BOGRAMA
next level die-cutting

Mobile module for transport- ing small-format products

with timed air blast for precise blowing of
the inner die-cuts.

Transfer unit UEB 550 B, the mobile link between the BSR 550 Servo die-cutter and downstream delivery units.

The products are fixed and transported with
flat belts.

The inner sections are blown out with pinpoint accuracy using timed air blast.

Interface to downstream machines, e.g. SAB 550 Stream Delivery.

Applications:

- Picking up and transporting small-format die-cut products
- Breaking out internal die-cuts with timed air blast

Technical data:

Product transport: 5 x flat belt transport elements
Disposal of inner cuts: 5 x separation elements with air blast
Working width; 550 mm

Benefits:

- Stable product transport for small-format products
- Precise blowing out of inner die-cuts
